-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Logan et al. Logan et al disclose a cooling system (note the Abstract, for example) for a watercraft with a drain hoses (column 2, last line), a drain port 25 with a valve 1. The system of Logan et al is capable of being used in a small watercraft and to drain water where water tends to remain.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made:

4. Claims 3-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Logan et al in view of Nix et al. Logan et al do not disclose a valve with a tapered cylindrical portion with a tapered bore. Nix et al teach a valve with a plug 38 and tapered cylindrical portion (bottom portion of 10, Figure 2) with a cylindrical bore 20. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the valve of Logan et al with a plug and a tapered cylindrical portion with a cylindrical bore as taught by Nix et al for improved fluid flow and less noise.
